

TASK 4 – Real-Time Classroom Poll

App.js

```
import React, { useState } from "react";

function App() {

  const [yesVotes, setYesVotes] = useState(0);
  const [noVotes, setNoVotes] = useState(0);

  return (

    <div style={container}>

      <h2>Task 4: Classroom Poll</h2>

      <p>Do you understand React?</p>

      <button onClick={() => setYesVotes(yesVotes + 1)}>Yes</button>

      <button onClick={() => setNoVotes(noVotes + 1)}>No</button>

      <p>Yes Votes: {yesVotes}</p>

      <p>No Votes: {noVotes}</p>

    </div>

  );
}

const container = {

  width: "400px",
  margin: "50px",
  padding: "20px",
  border: "1px solid #ccc",

};

export default App;
```
