TASK 5 – Feedback Form (Dynamic Display)

App.js

```
import React, { useState } from "react";

function App() {
  const [feedback, setFeedback] = useState("");
  const [feedbackList, setFeedbackList] = useState([]);

  const submitFeedback = () => {
    if (feedback !== "") {
      setFeedbackList([...feedbackList, feedback]);
      setFeedback("");
    }
  };
  return (
    <div style={container}>
      <h2>Task 5: Feedback Form</h2>

      <input
        type="text"
        placeholder="Enter your feedback"
        value={feedback}
        onChange={(e) => setFeedback(e.target.value)}
      />
      <button onClick={submitFeedback}>Submit</button>

      <ul>
      {feedbackList.map((item, index) => (
        <li key={index}>{item}</li>
      ))}
      </ul>
    </div>
```

```
  );
}
const container = {
  width: "400px",
  margin: "50px",
  padding: "20px",
  border: "1px solid #ccc",
};
export default App;
```
