TASK 3 – Mini Online Quiz (Dynamic Score)

App.js

```
import React, { useState } from "react";

function App() {

  const [score, setScore] = useState(0);

  const [answered, setAnswered] = useState(false);

  const handleAnswer = (isCorrect) => {

   if (!answered) {

     if (isCorrect) setScore(score + 1);

     setAnswered(true);

   }

  };

  return (

   <div style={container}>

     <h2>Task 3: Online Quiz</h2>

     <p>Which language is used for React?</p>

     <button onClick={() => handleAnswer(false)}>Python</button>

     <button onClick={() => handleAnswer(true)}>JavaScript</button>

     <button onClick={() => handleAnswer(false)}>Java</button>

     <h3>Score: {score}</h3>

   </div>

  );

}

const container = {

  width: "400px",

  margin: "50px",

  padding: "20px",

  border: "1px solid #ccc",

};

export default App;
```

Task 3: Online Quiz

Which language is used for React?

Python | JavaScript | Java

Score: 0
